

Statement re: Processing plant effluent

November 28, 2017

TOFINO B.C. – Lions Gate Fisheries, like all plants processing Pacific salmon – farmed or wild – on B.C.'s coast, operates its Tofino plant under permit from the provincial government.

Effluent from the plant is screened and discharged into the marine environment at depth according to the provincial government permit.

Lions Gate Fisheries processes Pacific Chinook raised by Creative Salmon. Both the plant and Creative Salmon are certified to the Canadian Organic Aquaculture Standard. This is an audited, national standard that exceeds municipal, provincial, and federal regulatory requirements.

About Creative Salmon

Creative Salmon is a Canadian company founded in 1990. It is one of the smallest salmon farming companies in Canada and currently the country's only certified organic farm-raised salmon producer. Creative Salmon employs 55 people full-time, year-round on the West Coast of Vancouver Island.
